

# Mrs. J. Schmidt's 3rd Grade News

**Week of September 6-10, 2010**

In science this coming week, we will be setting up a mealworm habitat to observe over the next few weeks. The students will be viewing a complete metamorphosis as the worm becomes a pupa and then a beetle (adult). They will be having a quiz on Animal Life Cycles on Thursday. We will review for the quiz together on Wed.

Their science folders will come home on Wed. night for independent review of their notes. They should only have to study their notes for 10-15 minutes. Do not stress!

There is no school on Monday. However, we will be having spelling as usual. Cursive handwriting is coming along very nicely. The class will be learning the lower case w, e, l, and b this week and are already writing words.

Have a great 3-day weekend!
